Transwall ONE LP Environmental Data Sheet

Updated: 2026.07.14

Manufacturer: Transwall Office Systems Inc
Manufacturing Location: West Chester PA USA

LEED v4 + v4.1 CONTRIBUTIONS

- » MR Credit: Interiors Life-Cycle Impact Reduction
 - ONE LP glass walls are movable and demountable.
- » MR Credit: Building Product Disclosure and Optimization—Environmental Product Declarations
 - ONE LP has a third-party verified, product specific (Type III) EPD available.
- » MR Credit: Building Product Disclosure and Optimization – Sourcing of Raw Materials
 - FSC® Certified wood products, including ultra-low emitting formaldehyde + no added formaldehyde, available upon request.
 - ONE LP contains post-consumer and pre-consumer recycled content - reference values on previous page.
- » MR Credit: Construction and Demolition Waste Management
 - ONE LP produces considerably less waste than traditional drywall construction, contributing to onsite waste minimization.
 - ONE LP packaging can be easily recycled in most markets.
- » EQ Credit: Low-Emitting Materials
 - ONE LP is composed primarily of inherently non-emitting materials.
 - ONE LP does not require the use of interior adhesives, paints or sealants to be applied on site.
 - ONE LP is SCS Indoor Advantage™ Gold certified.
- » EQ Credit: Daylight
 - ONE LP can be specified to maximize daylighting.
- » EQ Credit: Quality Views
 - ONE LP can be specified to maximize quality views.

Disclaimer: ONE LP material content and recycled materials calculations are based on typical configurations and standard product offerings. Recycled materials calculations in this document are based on data provided by suppliers. Transwall makes conservative assumptions when compiling information to provide the most accurate calculations possible. Product recyclability is dependent on local program availability. This document is subject to change without notice.
