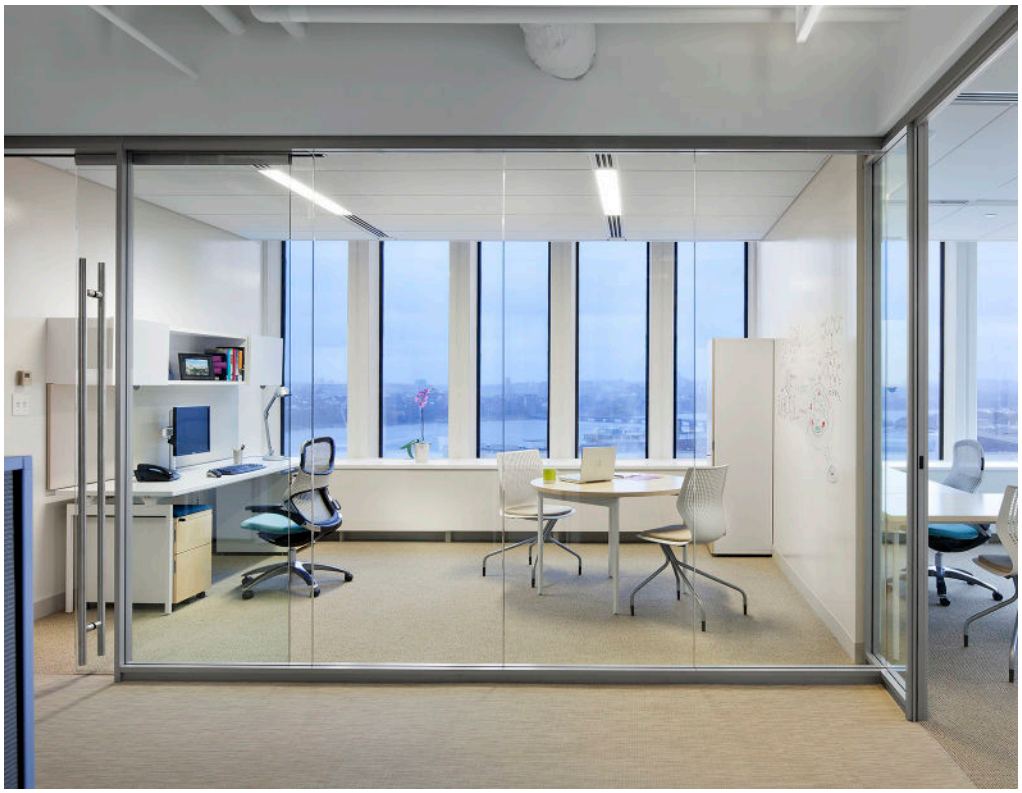
LEED v4 + v4.1 CONTRIBUTIONS

- MR Credit: Interiors Life-Cycle Impact Reduction
  - ONE SP glass walls are movable and demountable.
- MR Credit: Building Product Disclosure and Optimization—Environmental Product Declarations
  - ONE SP has a third-party verified, product specific (Type III) EPD available.
- MR Credit: Building Product Disclosure and Optimization – Sourcing of Raw Materials
  - FSC® Certified wood products, including ultra-low emitting formaldehyde + no added formaldehyde, available upon request.
  - ONE SP contains post-consumer and pre-consumer recycled content - reference values on previous page.
- MR Credit: Construction and Demolition Waste Management
  - ONE SP produces considerably less waste than traditional drywall construction, contributing to onsite waste minimization.
  - ONE SP packaging can be easily recycled in most markets.
- EQ Credit: Low-Emitting Materials
  - ONE SP is composed primarily of inherently non-emitting materials.
  - ONE SP does not require the use of interior adhesives, paints or sealants to be applied on site.
  - ONE SP is SCS Indoor Advantage™ Gold certified.
- EQ Credit: Daylight
  - ONE SP can be specified to maximize daylighting.
- EQ Credit: Quality Views
  - ONE SP can be specified to maximize quality views.



Disclaimer: ONE SP material content and recycled materials calculations are based on typical configurations and standard product offerings. Recycled materials calculations in this document are based on data provided by suppliers. Transwall makes conservative assumptions when compiling information to provide the most accurate calculations possible. Product recyclability is dependent on local program availability. This document is subject to change without notice.
