SILENCE

Transwall's SILENCE is an acoustic glass wall system for offices and businesses that want to design workspaces around environmental wellness. SILENCE glass office walls feature an ultra thin profile that integrates with other furniture systems. A double-glazed wall system delivers top-notch acoustical privacy.

SILENCE partition walls and glass pane vertical surfaces are created with tempered glass between 10 to 12MM in thickness so you can enjoy the acoustic benefits of a solid wall and a minimalist, transparent aesthetic. Respected designer Sergio Lion, first created SILENCE for the European market. Transwall gives you the opportunity to customize with SILENCE double or single glass panels and choose from a range of finishes from wood to melamine or powder-coat
